

Hi,

We're the green punnets, pots or trays you may have spotted or even purchased from your local garden centre. We're predominately annual, edible or colourful and we all come from a greenhouse located just outside of Albury / Wodonga.

In short we're high quality Flower, Vegetable Seedlings and Potted Colour, you can identify us quite easily as we all carry the same identification, pottedcolour.com.au; look for this on our label or pot to be sure you have a quality product in your hands.

We're quality grown annuals produced so that you get the best results at home in your garden, plant us where you want that colourful border, plant a mix of us in that colourful tub at your front door or out back by your patio table, plant rows and rows of us in your vegetable garden for fresh picking and tasty home cooking. The kids can do the picking!

Spruce up the outside of your home in an instant when you purchase us already in flower, check this site often or follow us on facebook for tips and ideas on how to use us at your place.
